

A partnership for success.

TSA works with The St Vincent de Paul Society (WA) to ensure they use technology to efficiently support their business needs in a cost contained manner. We provide innovative solutions under a unique Technology Partner Model for WA and Qld.

Recognising the valuable work that St. Vinnies do in the community, TSA work with them to improve the value of the donated dollar. This is evident with TSA supporting the Web Services that process the online donations for the current 2005 Winter Appeal both locally & nationally.
